

# JAKE THOMAS

## SOFTWARE DEVELOPER

### SUMMARY

Outgoing Software Developer with a background in communication and talent in research. Experienced leader who is comfortable teaching and presenting detailed information to others.

### PROJECTS

#### Hire Lambda Students

Web app built to allow potential employers to find Lambda students in their areas that are available for employment with highlighted skills and projects that the student has worked on.

React/Redux | Node.JS | Express | PostgreSQL

- Built in 5 weeks with a team of 6 developers, serving as a front-end developer
- Solely responsible for the admin pages using material UI and the "Contact Me" form using SendGrid's API
- Consulted with staff members in need of this product, ensuring all specifications and features were implemented
- Organized with remote team members over Slack and Zoom, participating in 2-3 daily stand-ups to ensure proper communication

#### To-Do App

Web app built to assist user in creating, reading, editing and deleting notes for organizational purposes.

React | Node.JS | Express

- Built over the course of two weeks, prioritizing the build out of the front-end in the first week, and connection to back-end in the second week
- Implemented front and back-end skills by executing entire project independently

### EMPLOYMENT

#### Lambda School · Remote

Team Lead, Full-Stack Web Development · Jan. 2019 to Apr. 2019

- Managed a group of 6 students with daily stand-up meetings to build unity, share progress, and discuss areas of improvement to further learning
- Provided individual code reviews on each developers' daily work using GitHub
- Met with each student weekly to talk about progress, struggles, and where they could use more resources and guidance to enhance their learning experience

#### The Context Network · Remote

Research Analyst · May 2017 to Aug. 2018

- Conducted market research interviews with agricultural professionals
- Organized and analyzed data to provide professional recommendations
